

ASHLEIGH MOORE

Ring Size Guide

Place your ring over the guides below and match the inside diameter to find your ring size.

If you are purchasing one of our Classic or Wide Band styles, we suggest you measure a similar width ring as the wider rings can cause you to go up a size.

Please note:

Your finger size can change throughout the day. Our fingers tend to be larger in the evening and can be affected by heat, medication, hormones and injuries.

With this in mind, it is important to check your size across the day to get the most accurate idea of which ring size would be most comfortable for you.

Sizing recommendations:

If you are in between sizes, we recommend going with the larger size.

If you are purchasing one of our Classic (5mm) or Wide (7mm) Band styles, we suggest you go one size larger than your usual.

Scale Check:

When printing, make sure the scale is set at 100%. You can check the size by placing a ruler on the line - it should measure 50mm (5cm).
